"Custom-coded websites built for speed, credibility, and growth — not templates."

WHY CUSTOM CODE

WordPress and Wix rent you a website. Custom code means faster load times with no plugin bloat, no recurring platform fees eating into your margins, and a site that's genuinely yours — built to your exact needs, not squeezed into a template.

PACKAGES

Basic

₹5k-₹20k*

- Single page or up to 5 pages
- Custom-coded, mobile-responsive
- Contact form
- Basic on-page SEO

Discovery call

Understand your business and goals

02

Design draft

You review before any code is written

03

Build

Development with progress updates

04

Launch + handover

Site goes live, you get full ownership

WHY WORK WITH ME

I've built and shipped a production healthcare application alongside freelance web projects — carrying each one from design through deployment. When you work with me, you talk directly to the person writing the code: no account managers, no middlemen, no messages lost in translation.

* Price ranges are indicative — final quote depends on the specific scope of your project.

Let's talk about your project.
